New Meter Reports Software Makes It Easy to Visualize Site-Wide Historical Data

PULLMAN, WA — October 6, 2014 — Schweitzer Engineering Laboratories, Inc. (SEL) today announced the availability of ACSELERATOR[®] Meter Reports SEL-5630 Software. This new software allows customers to visualize site-wide historical data and optimize energy usage as a result.

After ACSELERATOR TEAM[®] SEL-5045 Software collects and organizes data from SEL meters in a central database, Meter Reports Software displays the measurements in a clean and presentable format. Reports include:

- Device Overview—Display all system device information, including metering point names, locations, enabled status, and time zones.
- Load Data Profile (LDP)—View trends and inspect load information from a selected metering point, device, or group.
- Voltage Sag, Swell, and Interruption (VSSI)—View VSSI data with a 4 ms resolution.
- Water, Air, Gas, Electricity, and Steam (WAGES)—Track WAGES consumption and generation.
- Sequential Events Recorder (SER)—View SER reports side by side to correlate events from multiple devices for the same time period.
- Energy Balance—Calculate unmetered usage and identify losses.

“SEL is excited to release Meter Reports as the newest addition to the ACSELERATOR Software suite and the latest extension of SEL’s metering solutions,” said SEL Power System Director Tony Lee. “This new software enhances data analysis and visualization, which in turn helps to increase efficiency, improve power quality, and decrease cost.”

ACSELERATOR Meter Reports SEL-5630 Software can be used with the SEL-734 Advanced Metering System and SEL-735 Power Quality and Revenue Meter. The software is available for \$100 per device. To download a 60-day trial and for more information on ACSELERATOR Meter Reports features, benefits, and applications, visit www.selinc.com/p214.

SEL serves the power industry worldwide through the design, manufacture, supply, and support of products and services for power system protection, monitoring, control, automation, and metering. For more than thirty years, SEL has offered unmatched local technical support, a worldwide, ten-year product warranty, and a commitment to making electric power safer, more reliable, and more economical.
