SEL Now Offers Custom Enclosure Design and Assembly

PULLMAN, WA — October 14, 2008 — Schweitzer Engineering Laboratories, Inc. (SEL) today announced the availability of custom enclosure design and assembly services. SEL offers custom enclosures, accessories, and metal parts with top-quality wiring, terminals, products, workmanship, and service at accelerated turn times.

SEL integrates multiple pieces of equipment (from SEL and other vendors) into a single enclosure or cabinet, enabling one-stop shopping for parts and labor with a quick turnaround time. Every end product is designed, assembled, wired, and tested to the customer's specifications. SEL can also help with low-volume enclosures or specialty metal parts.

SEL creates a single part number for each design, simplifying customer ordering. Wiring tables, schematics, and photos are archived so that every order is consistently duplicated. Each order includes as-built drawings to depict the final installed configuration.

SEL's experienced team has completed many custom projects, including the following:

- Enclosures with relays and a power supply
- Prewired assemblies for easy integration and minimal field wiring
- Enclosures with recloser controls, communications products, and test switches
- Wiring conversion assemblies and terminals
- Test racks, fully wired and assembled
- Custom adapters and rack panels to integrate SEL relays into an existing system

Typical delivery will be four weeks from receipt of purchase order to shipment. For fastest delivery cycle, SEL offers standard enclosures that can be customized to meet unique specifications. SEL can also accommodate requests for enclosures with other sizes, materials, and features.

For more information on the features and benefits of SEL custom enclosure design and assembly services, contact your SEL representative or visit www.selinc.com/p94.

SEL serves industry worldwide through the design, manufacture, supply, and support of products and services for electric power protection, monitoring, control, automation, data encryption, and metering. SEL offers unmatched local technical support, a worldwide, ten-year product warranty, and a commitment to making electric power safer, more reliable, and more economical.
