

SEL-MCG

Magnetic Cable Guide

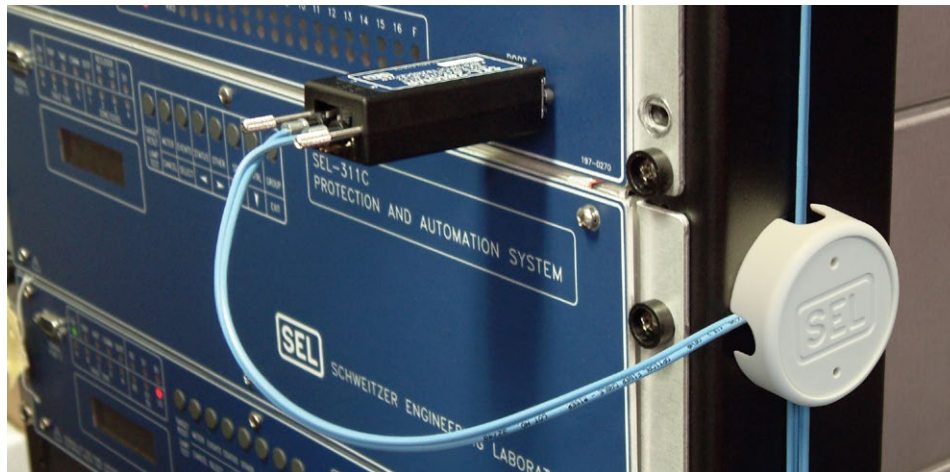

Keep remote display and sensor cables neat and secure

- Keep cables neat inside of pad-mounted cabinets.
- Hold cables against racks.
- Organize computer cables at your desk.

Overview and Applications

Designed to keep display wiring in place against the inside of an enclosure, SEL-MCG Magnetic Cable Guides are easy to reposition when working inside the enclosure, making them a favorite tool of technicians and electricians worldwide. The magnetic strength is great enough to hold approximately 750 grams of weight when placed on a smooth surface.

Attach cables to racks and server cabinets.

Keep fault indicator cables neat and secure inside pad-mounted cabinets.

Organize computer cables at your desk.
