

CYBER SERVICES

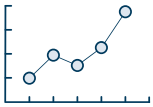

Cybersecurity Life Cycle Services

Personalized cybersecurity support from accredited industrial control system (ICS) and operational technology (OT) engineers.

Cyber Maintenance | Cyber Monitoring | Cyber Readiness and Response

No matter where you are in the cybersecurity life cycle, we have a tailored service package that can empower your organization with our decades of OT engineering and cybersecurity expertise. Whether you need to maintain and monitor the security controls of your new SEL-designed and -commissioned OT system or maximize your cybersecurity effectiveness with proactive planning and response, our expert security staff can carry as much of the workload as you need.

Cyber Maintenance

With our cyber maintenance services, we provide ongoing maintenance for ICS and OT systems designed by SEL. This package includes a number of measures to help secure your ICS and OT environments, where we:

- Keep your software and firmware versions up to date.
- Periodically review security logs for system optimization.
- Assess your system to uncover potential issues before they become larger problems.

Cyber Monitoring

With our cyber monitoring services, we can improve your asset visibility and threat detection capabilities through expert monitoring, whether your system was designed by us or another vendor. With this service package, SEL will:

- Monitor your network for suspicious activity and alert your team if detected.
- Regularly report on security threats and activity.
- Review access logs, system logs, and security alerts, fulfilling the role of a full-time internal security analyst.

Cyber Readiness and Response

With our cyber readiness and response services, we will maximize your cybersecurity effectiveness with proactive planning and response. As part of our strategic planning service offerings, we can:

- Proactively assess and strengthen your cybersecurity posture with a wide variety of preventive measures.
- Minimize the impact of cyber events that do occur and help you return to normal operation quickly.
- Offer unmatched expertise from a workforce dedicated to a broad variety of OT environments.

Contact SEL at secure@selinc.com to connect with our team of OT cybersecurity experts.
